VICTORY-SCHOOL-CLUB-MEMBERSHIP-SYSTEM

REQUIREMENTS

- PHP version 8+
- MySQL

SETUP AND RUN

1. Install PHP

- Download and install PHP from the official PHP website: https://windows.php.net/download
- Ensure PHP is added to the system `PATH` during installation so you can run PHP commands from the command prompt.

2. Install PHP-MYSQLI Extension

- The `mysqli` extension is required to connect to MySQL. It is often included by default, but you can ensure it's enabled by modifying your `php.ini` file:
  - Locate the `php.ini` file in your PHP installation folder.
  - Uncomment (remove the semicolon) the following line:

    ```
    extension=mysqli
    ```

3. Set Up MySQL

- Download and install MySQL from the official MySQL website: https://dev.mysql.com/downloads/installer/
- Follow the MySQL installation guide to complete the setup.

4. Import Database

- Create a new MySQL database for the system.
- Acesss the mysql terminal emulator
- Copy sql code and paste the press `ENTER`
- This creates the database

5. Run the Application

- Navigate to the directory where the application is located.
- Start the PHP built-in server by running the following command:

  ```
  php -S localhost:8000
  ```

6. Access the Application

- Open your web browser and go to: http://localhost:8000
- You should now see the Victory School Club Membership System running on your local server.

ADDITIONAL INFORMATION

Troubleshooting

- If you face any issues with PHP or MySQL connections, ensure that both services are running.
- Check your `php.ini` and `my.cnf` (MySQL config) files for any configuration issues.

License

- This project is open-source and available under the MIT License.

Enjoy managing your school club memberships efficiently with the Victory School Club Membership System!
